

# AMTA Symposium

## Student Travel Scholarship

*Sponsored by the Antenna Measurement Techniques Association*

**Awardee receives free travel, accommodations, and registration for  
The 2015 AMTA Symposium  
October 11 – 16 in Long Beach, California**

- Open to undergraduate & 1<sup>st</sup> year graduate students interested in learning more about antennas, antenna measurement techniques, and related electromagnetic applications
- A mentor will be assigned to facilitate the student's participation in the conference

**To apply, students must submit:**

- An essay about his/her interest in [AMTA](http://www.amta.org), antennas, radar, or/and electromagnetic-related field, giving background and plans for the future,
- A resume with course/grade listings,
- A letter of recommendation from the student's advisor or faculty member, or an AMTA Senior Member or Fellow who is not a sitting Board Member or a member of the scholarship selection committee.

**Submittal Deadline:** August 1, 2015

Award Announcement: September 4, 2015

Symposium: October 11 – 16, 2015

See [www.amta2015.org](http://www.amta2015.org) for complete details or contact the Scholarship Chairman at [scholarship@amta.org](mailto:scholarship@amta.org)

The **Antenna Measurement Techniques Association (AMTA)** is an incorporated, non-profit professional organization dedicated to the advancement and education of antenna measurements. Our members come from a variety of backgrounds, including industry, government, and educational institutions from around the world. The AMTA's primary focus is to provide a forum that facilitates a technical exchange for the purpose of advancing antenna and scattering measurements. This is achieved through a variety of sponsored activities, which includes an annual one-week symposium and periodic 1-day regional events. The annual symposium revolves around a technical program and vendor exhibition, and attracts more than 400 attendees and 40 exhibitors from around the world. This week long event showcases the latest techniques, innovations, and offerings from the industry leaders. One of the highlights of the symposium is Student Day, where AMTA plays host to engineering students from local academic institutions. This program provides students with an opportunity to interact with engineers and mentors from various different disciplines, as well as potential future career opportunities.

This year's symposium is being held at the Hyatt Regency in downtown Long Beach, CA during the week of October 11 – 16, and is being hosted by Nearfield Systems, Inc., an industry leader in antenna measurement solutions. This venue not only offers access to the many attractions and temperate climate Southern California has to offer, but is also easily accessible for both domestic and international participants.
