

Antenna Measurement Techniques Association
Distinguished Achievement Award

Presented to

Greg Hindman

The 2012 AMTA Distinguish Achievement Award is presented to ***Greg Hindman***, who throughout his career has exemplified and promoted the goals and objectives of the ANTENNA MEASUREMENT TECHNIQUES ASSOCIATION. The AMTA hereby cites Greg Hindman:

- For the development of planar, cylindrical and spherical near-field test methodologies.
- For the development of commercially viable near-field antenna test systems
- For the development of portable near-field antenna test systems.
- For the development of the Mathematical Absorber Suppression technique.
- For the development of electrical alignment techniques for spherical near-field test systems.
- For the implementation and commercialization of optical correction system for planar near-field testing.
- For the development of near-field error suppression techniques.
- For his many ongoing years of AMTA support.

For outstanding and pioneering contributions to the development, practice and commercialization of near-field antenna measurements.
